LUXMI OFFSET
Commercial Printers

PRECISION • TIMELY • TRUST

Luxmi Offset is a budding state of the art full service printing company that was established in 1984. It is focused on the printing needs of the corporate sector and the general public. It is our intention to provide the best possible printing solutions where attention is given to quality and detail, resulting in satisfied clients with whom we have lasting business relationships. The foundation of our business is integrity and honesty. We take pride in the client relationships that have developed resulting in interdependency and mutual growth.

INTRODUCTION

Packaging plays an important role in allowing products to respond to the demands and needs of modern consumers. Packaging is one of the most cost-effective weapons in a marketer's arsenal. It requires a relatively self-effacing investment, lasts a long time.

The role of packaging in business has undergone a major change, and it has today assumed a very major role. Traditionally, packaging was defined as the activities of designing and producing the wrapper or container for a product. This definition is no longer adequate. Today, packaging has emerged as a major technology in itself, which is highly complex and specialized, highly multi-functional, cross functional and very application oriented.

Corrugated paper board boxes are one of the safest and efficient means of packaging and shipment of goods. Corrugated board consists of a flat layer of paper sheet (liner) glued on one or both sides of a corrugated paper. The corrugated board is made by passing two layers of Kraft paper through corrugating machine. One layer of paper becomes corrugated after being passed through the heated rolls and other is brought into contact with it after the former having glued at tips. When only one liner is used, the product is known as "Single face" or "two ply" board. This board is flexible in one direction. When the corrugated medium is combined on both sides with flat sheets, it is known as double faced or "3-ply board". Similarly, board can be pasted to form thicker boards i.e. 5-ply, 7-ply and 9-ply etc.

Corrugated Carton Boxes

Coloured Corrugated Boxes
